

## Press Release

### **Resolutio Nova Ltd has launched a cloud-based service for trail and surveillance cameras.**

Finnish technology startup Resolutio Nova Ltd has developed a new cloud-based service, zeemage.com, enabling the reception, management, viewing, and analysis of images from trail and surveillance cameras. The service is accessible on all browser-based platforms and utilizes Microsoft's Azure server centers.

Resolutio Nova Ltd is a new Finnish technology company focusing on innovative solutions in trail and surveillance camera technology. The company's mission is to facilitate and enhance the management and analysis of images.

**Zeemage.com** is a cloud-based service designed specifically for the reception, management, and analysis of images from trail and surveillance cameras. The key features of the service include:

- Usability across all browser-based platforms (mobile phone, PC, smart TV)
- Fast image updates and a simple user interface
- Login with Google or Apple accounts
- Analysis and storage of images and videos, as well as the creation of thumbnails and GIF files
- Brand-independent: The service aims to ensure that users get a full experience from all their cameras, regardless of the brand or manufacturer. It is possible to connect image feeds from various cameras and services without the user having to commit to a specific supplier's products.

#### **The main views of the service are:**

- Control room: Define the feeds of desired cameras and monitor images in real-time.
- Gallery: View all received images (default view: images from the last 2 weeks) and modify search criteria as needed.
- Large image: Browse images one by one from a specific camera or all cameras.
- Graphs: Analyze the occurrence of images and switch to view images from a specific time.
- Comparison: Compare images side by side and adjust views with a slider.
- Additional features: Favorite status, bookmarks, automatic deletion, time adjustment, language change, and creation of sharing codes.
- Languages: English and Finnish, 9 new languages to be added soon
- And more to come

#### **References:**

- Kalle Pihelgas, Estonian semi-professional photographer: "With almost 20 cellular cameras, Zeemage made my life much easier."
- Kalle Markkula, "Nordic Hunting": "There is no going back."
- Rami Hietaniemi, "Hietaniemi Hunting": "The king of trail camera apps."
- Taneli Sinisalo, "Tracking Deer" & "Fishing": "It's been working well, and I have definitely found it useful - a really good product."

The service is available to all users of trail and surveillance cameras who send images via email. Images can be sent directly from the camera to the Zeemage address or can utilize forwarding features such as those in Gmail or Outlook. The service is available for free trial use throughout the summer of 2024, with billing commencing in the fall. Test use does not require credit card or payment information. After the trial period, users can choose a monthly or yearly subscription. To log in to the service, visit [zeemage.com](https://zeemage.com).
